

## **Water Resource Management and Information Technology**

Prof. Brent Haddad  
Professor, Environmental Studies  
University of California, Santa Cruz

### **Abstract:**

Water and energy are two essential natural resources. Professor Haddad studies them both independently and in terms of how they interact with each other. He will provide an introduction to water and energy management and finance at both the national and local levels. He will also discuss the many roles of information management in the fields of energy and water.

### **About the speaker:**

Professor Brent Haddad was the founding chair of the Technology Management Department. He has recently returned to the Environmental Studies Department. He studies natural resource management and holds both an MBA and a PhD. In addition to being a professor, he has consulted for many years on energy and water issues.
